Sustainable Tourism Community

MED CLUSTERS

The Community of the Sustainable Tourism Mission

The Sustainable Tourism Mission of the Interreg Euro-MED Programme focuses on fostering a circular tourism, considering the sustainability of ecosystem services using innovation technologies, and promoting the preservation of natural resources and cultural heritage.

Two governance projects work jointly to develop solutions and promote cooperation in the Euro-MED and beyond, to increase the coordination level and institutional capacity to make tourism greener, smarter and more resilient.

Thematic Community Project

Community4Tourism contributes to the Sustainable Tourism Mission of the Interreg Euro-MED programme by increasing the coordination and institutional capacity to make the tourism greener, smarter and more resilient. The project fosters the reuse of results and best practices of the community of projects, supports the transferring of successful initiatives and results and increases the coordination among the stakeholders who - in the Mediterranean Region and beyond - are committed to the tourism governance and territorial cooperation. Community4Tourism aims at consolidating a competitive innovation ecosystem, to support a circular economy, to promote climate change adaptation, to safeguard nature and biodiversity and collaborate to the transition towards a climate-neutral and resilient society.

Institutional Dialogue Project

Dialogue4Tourism addresses transnational coordination of governance throughout the Mediterranean area by reinforcing the visibility of the Euro-MED Sustainable Tourism Thematic Community's results. The project's aim is to engage policy key actors through advocacy and transferring actions for this purpose. This project increases not only the coordination and institutional capacity of public authorities, programmes, strategies, decision-making networks and funding mechanisms in the Euro-MED cooperation area, but also in the Southern and Eastern Mediterranean regions. This ensures tourism to become greener, smarter and more sustainable.

The Thematic Community Project Partnership

The MED Clusters

The Community4Tourism project has launched the Mediterranean Clusters to promote the dissemination of the results of the Community of projects and the participation of actors, beyond the Sustainable Tourism Community.

These strategic networks shall facilitate the dissemination of knowledge and the transfer and mainstreaming of these results to enhance their impact, through the involvement of relevant external actors working on tourism-related topics.

MED Clusters activities

1. Regular internal meetings along the year, to work on contents, challenges, sharing news and outputs.
2. Annual face-to-face event, to showcase and discuss the activity of the clusters.
3. Production of Thematic Orientation Papers, roadmaps for the activities of the clusters, with the support of external experts.
4. Production of Policy Papers, a set of suggested actions for policymakers to consider.
5. Production of Best Practices Reports for the capitalisation and mainstreaming of the results.

Innovation

MED Cluster thematic description

This Cluster will cover different topics related to the **innovation** and **use of advanced technologies** in the tourism sector, reinforcing tourism as a growth sector supporting environmental and climate change initiatives, improving innovation capacities, competitiveness internationalization and promoting new business models, among others.
